

Main Features – Important update!

- Bugfix release for WebIQ Server containing important fixes
- **Please note that this release only updates the WebIQ Server, there are no changes in WebIQ Designer and WebIQ Visuals so these will still be shipped in version 2.15.0**

WebIQ Visuals

- No change
- Still version 2.15.0

WebIQ Designer

- No change
- Still version 2.15.0

WebIQ Server

- WEBIQ-3985 Fix: When updating WebIQ from a version < 2.14 to 2.15 it no longer worked. Updating from 2.14 to 2.15 worked.
- WEBIQ-3984 Fix: When updating an HMI from a previous version the listeners were not migrated.
- WEBIQ-3987 Fix: 'Reset password' functionality did not work anymore
- WEBIQ-3986 Fix: On Linux ARM systems an error occurred when changing a user's password
- WEBIQ-3983 Fix: An HMI could not be loaded in WebIQ when a user's description field contained only numbers
- WEBIQ-3973 Fix: Alarm Manager: Alarm type 'watchdog' did not work anymore
