

Main Features

- Bugfix release fixing several bugs.

WebIQ Server

- WEBIQ-4148 Fix: When an item type changes in a short interval (e.g. on OPC UA server initialization) in certain circumstances the item type update was not sent by WebIQ Server (e.g. B&R)
- WEBIQ-4130 Fix: The auto-logout setting was broken since WebIQ 2.15.0 and did not work anymore
- WEBIQ-4112 Fix: Runtime Manager: When uploading large HMIs on slower systems the upload was not detected

WebIQ Designer

- WebIQ Designer is unchanged and still at version 2.15.7.
