

## Main Features – Important update!

- Bugfix release for WebIQ Server.

## WebIQ Visuals

- No change

## WebIQ Designer

- No change

## WebIQ Server

- WEBIQ-4233 Fix: The characters '{', '}' and '|' did not work correctly in search queries, e.g. in WebIQ Designer.
- WEBIQ-4232 Fix: API: Specifying filters for custom alarm attributes or custom alarm context items did not work anymore.
- WEBIQ-4231 Fix: SQL Statement events have not been executed anymore (only custom SQL queries).
- WEBIQ-4029 Fix: Runtime Manager: when trying to start an HMI created with a newer version of WebIQ the error message indicated an older version.
